UNIVERSITY OF GALWAY

HR EXCELLENCE IN RESEARCH

Postdoctoral Researcher - Cell Biology
School of Biological and Chemical Sciences, College of Science and Engineering
Ref. No. 010433

JOB ADVERTISEMENT

Applications are invited from suitably qualified candidates for a full-time, fixed term position as a Postdoctoral Researcher in cell/ molecular biology, [School of Biological and Chemical Sciences](#) at the University of Galway, Ireland.

This position is funded by Science Foundation Ireland under an Award made under the Frontiers for the Future programme to explore links between centrosome biology and genome stability. It is available from 1st August 2024 to contract end date of 31st July 2027 (or later dates by arrangement). For informal enquiries, please contact Prof. Ciaran Morrison, Centre for Chromosome Biology, School of Biological and Chemical Sciences. Email: ciaran.morrison@universityofgalway.ie

The University is committed to embracing opportunities for hybrid working, to build a more dynamic, agile and responsive University, while sustaining strong standards of teaching, learning, research and high levels of productivity. The University will continue to be the primary workplace for all staff, however individual hybrid arrangement requests can be reviewed with the Line Manager in conjunction with the University [Hybrid Working Policy](#).

Salary: Postdoctoral Researcher salary scale €44,346 - €56,764 per annum, (subject to the project's funding limitations), and pro rata for shorter and/or part-time contracts.

The default position for all new public sector appointments is the 1st point of the salary scale. This may be reviewed, and consideration afforded to appointment at a higher point on the payscale (subject to the project's funding limitations), where evidence of prior years' equivalent experience is accepted in determining placement on the scale above point 1, subject to the maximum of the scale.

[\(Research Salary Scales - University of Galway\)](#)

Closing date for receipt of applications is 17:00pm (Irish Time) on 5th July 2024. It will not be possible to consider applications received after the closing date.

JOB DESCRIPTION

Job Description:

The successful candidate will explore centrosome functions, using cell biology, molecular genetic and biochemical analyses to test the mechanisms that act at the centriole distal end and that control centrosome numerical homeostasis. The successful candidate for this position should be curiosity-driven, creative, and passionate about science. A high degree of self-motivation and independence is important, as well as the

ability to communicate well within an international, multidisciplinary team. Further details are available on <https://chromosome.ie/>

Duties:

- Conduct a specified programme of research and scholarship on centrosomes/centrioles/cilia under the supervision and direction of the Principal Investigator.
- Perform tissue culture, fluorescence microscopy, molecular cloning and cell biology analyses and related techniques using appropriate technologies.
- Keep up to date with research related methods and techniques.
- Demonstrate a systematic understanding of the biology of centrosomes, cilia and DNA damage responses.
- Demonstrate the ability to manage a research project including the accurate and timely recording of data, presentation and discussion of findings, co-supervision of students.
- Contribute to the research project's dissemination - reports, papers, chapters, book contributions, etc.
- Mentor and collaborate with graduate research students, as appropriate and as directed.
- May participate in limited teaching hours for career development. The extent of this must not adversely impact the primary research role.
- To have knowledge and understanding of the policy, practices and procedures, relevant to the role (e.g. Commercial Awareness, Research Ethics, Knowledge Transfer, Patents, Intellectual Property Rights, Health and Safety, Equal Opportunities & Diversity).
- Any other duties assigned commensurate to this level of post.

ELIGIBILITY REQUIREMENTS

Essential Requirements:

- PhD in cell/ molecular biology, biochemistry or related area.
- Demonstrable experience in mammalian cell culture and gene targeting/ genome editing.
- Demonstrable research experience in microscopy (fluorescence and/ or electron).
- Demonstrable research experience in molecular biology.

Desirable Requirements:

- Experience in student project supervision.
- First author published/accepted research paper(s) in international peer-reviewed scientific literature.
- Specific research experience and expertise in centrosome and/ or ciliary biology.
- Specific research experience and expertise in DNA damage response.
- Specific research experience and expertise in protein biochemistry and/ or proteomics.

CONTINUING PROFESSIONAL DEVELOPMENT

Continuing Professional Development/Training:

Researchers at University of Galway are encouraged to avail of a range of training and development opportunities designed to support their personal career development plans. University of Galway provides
